# **VOLUME 1 FINAL REPORT**

# 1980 CENSUS OF POPULATION AND HOUSING

**LAGUNA** 

REPUBLIC OF THE PHILIPPINES

NATIONAL ECONOMIC AND DEVELOPMENT AUTHORITY

NATIONAL CENSUS AND STATISTICS OFFICE

MANILA

# REPUBLIC OF THE PHILIPPINES NATIONAL ECONOMIC AND DEVELOPMENT AUTHORITY

# HIS EXCELLENCY PRESIDENT FERDINAND E. MARCOS

Chairman

# Honorable VICENTE B. VALDEPEÑAS, JR.

Minister of Economic Planning and Director-General of the Authority

# NATIONAL CENSUS AND STATISTICS OFFICE

TITO A. MIJARES

Executive Director & Civil Registrar-General

MARCELO M. ORENSE Assistant Executive Director

# **FOREWORD**

This report is one of a series of provincial reports on the results of the 1980 Census of Population and Housing conducted on May 1, 1980.

Demographic data presented herein consist of population distributions according to age, sex, marital status, highest grade completed and literacy. Other bases as gainful occupation, industry and migration are included likewise.

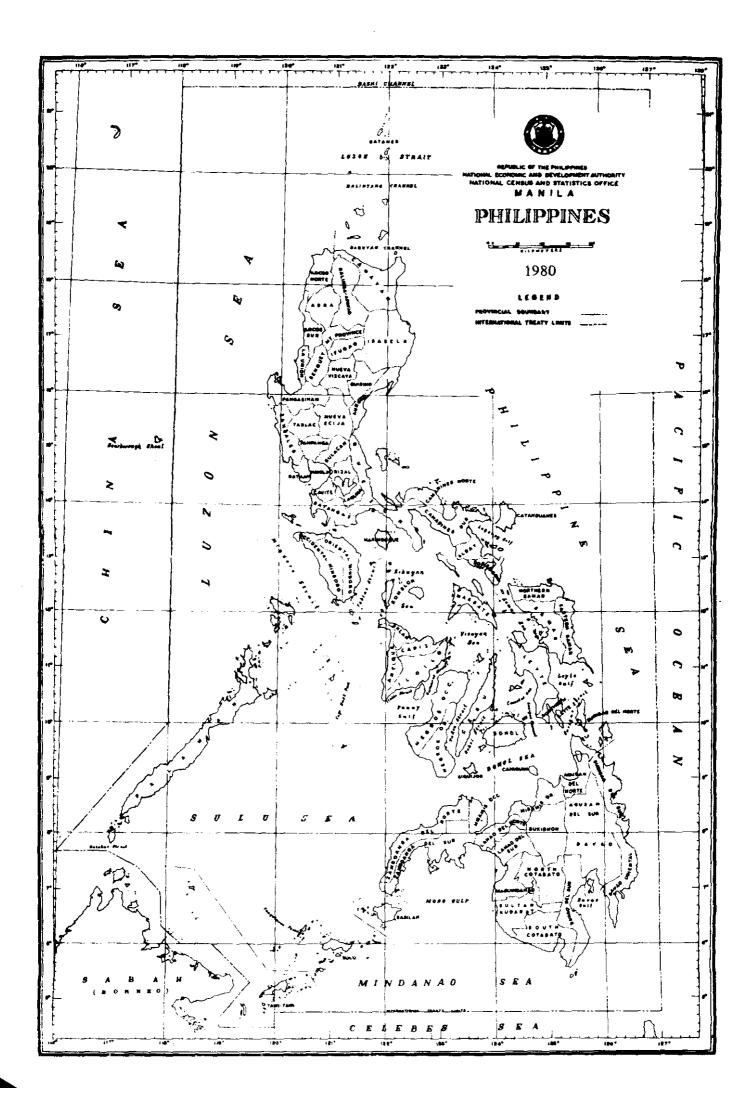

In the other aspect of the census, the following housing characteristics are considered: type of building, structural characteristics, floor area, type of tenure, use and source of water supply, lighting, type of toilet facilities, kind of cooking fuel used and appliances.

Subsequent issues will be the National Summary (Volume II) containing summary data on the final provincial reports and the Special Volume on National Capital Region (Metro Manila Area) which will cover data on the social, economic and demographic characteristics of the region.

Grateful acknowledgment is due the National Census Coordinating Board, government agencies, committees and the local coordinating boards for their invaluable assistance and cooperation.

TITO A. MIJARES

Manila, Philippines May 1983

# **Explanatory Text**

# **GENERAL**

# INTRODUCTION

The National Census and Statistics Office conducted in May 1980, the 1980 Census of Population and Housing. This type of Census was also undertaken in May 1970. In May 1975 the Census of Population was taken as Phase I of the 1975 Integrated Census of the Population and Its Economic Activities. This nationwide undertaking was designed to obtain comprehensive data on the size, distribution, structure, change and socio-economic characteristics of the population and to take inventory of the housing accommodations, their geographic location, structural characteristics, available facilities, etc.

The population report contains data gathered from private households as well as collective households, while data on housing were collected from private households only.

It should be emphasized at this point that a complete enumeration of all households throughout the country was made but only sample household questionnaires representing 20 percent of the listed households were processed and the data published in this volume. In so doing, however, the total population count by barangay, male and female, obtained from the listing sheet taken simultaneously during the enumeration was maintained in computing the weights or expansion factors. It should also be noted that data on Tables 1 to 4 of the population tables refer to total population, that is, the population of the private households plus the collective households while Tables 5 to 10 cover exclusively the private household population.

Pursuant to the provision of Batas Pambansa Bilang 72, a final count of the population, by sex at barangay level was submitted to the President and was approved under Proclamation No. 2170 dated March 12, 1982. This report was published separately in 74 provincial volumes.

# **AUTHORITY FOR THE 1980 CENSUS**

Under Commonwealth Act No. 591, the National Census and Statistics Office is authorized "to prepare for and undertake all censuses of population, agriculture, industry and commerce."

It may be mentioned in this regard that sometime in February 1980 Parliamentary Bill No. 809 was presented at the Batasang Pambansa, providing for the taking of an integrated census every ten years beginning 1980, with May 1 of every censal year as the reference date. This bill was approved into Batas Pambansa Bilang 72 on June 11, 1980, more than one month after the start of enumeration.

# INTER-AGENCY PARTICIPATION

The expertise and technical advice of the National Economic and Development Authority Inter-Agency Committee on Population and Vital Statistics and its Technical Working Group on 1980 Census of Population and Housing played a vital role in the successful undertaking of the census.

The Committee's main function was to review the questionnaire, methodologies, concept, tabulation and other related aspects of the census in the production of data and development of systems that would produce more reliable and accurate result. It had for its chairman the Dean of the University of the Philippines Population Institute (UPPI) and for its members, one representative each from the Ministries of Human Settlements (MHS), National Defense (MND), Education and Culture (MEC), Health (MOH) and Local

Government and Community Development (MLGCD); the Commission on Population (POPCOM); National Economic and Development Authority (NEDA); and two representatives from the National Census and Statistics Office (NCSO). The Technical Working Group (TWG) for the 1980 Census of Population and Housing was headed by the Chief of the National Census and Household Surveys Department of NCSO and the members were representatives from the MHS, EPRS-NEDA, SCO-NEDA, POPCOM, UPPI, MOH, MEC, and the National Housing Authority (NHA).

Recommendations were likewise solicited from other government agencies for questions that should possibly be included in the population and housing portions in order to fill their data needs.

As early as August 1977, an NCSO Technical Committee for censuses was created. Ranking officials of the National Census and Statistics Office comprised the committee, with the Assistant Executive Director as Chairman, the Chief of the National Census and Household Surveys Department (NCHSD) as Vice-Chairman and Heads of six other departments and staff offices as members.

The committee coordinated with the Inter-Agency Committee and TWG of the NEDA on the technical aspect of the census and rendered a monthly progress report to the Executive Director. It provided the overall direction of the activities of the different subcommittees on census. The two subcommittees created, the Sub-Committee on Population and Housing Census and the Sub-Committee on Operations and Logistics Support, were directly charged with the preparatory work for the census undertaking.

# **CENSUS BOARDS**

A systematized involvement of government agencies and instrumentalities was made possible largely through the concerted efforts of the members of the National Census Coordinating Board (NCCB) and the Provincial, City and Municipal Census Boards. The national board was created by NEDA Memorandum Order No. 4-80, dated April, 1980 and the local boards, by Memo Order No. 5-80, dated April 1, 1980, by virtue of the powers vested in the Minister of Economic Planning under Section 3 of Presidential Decree No. 1200.

The NCCB was headed by the Minister of Economic Planning as Chairman with the Executive Director as Executive Officer. Named as members were the Ministers of Agriculture, Budget, Education and Culture, Finance, Human Settlements, Public Works, Justice, Labor, Local Government and Community Development, National Defense, Natural Resources, Public Highways, Public Information and Transportation and Communication. Rules and regulations necessary for the successful undertaking of the census were issued by the Board.

At the local government level, similar functions were carried out by the Provincial City and Municipal Census Boards. The Provincial Governor headed the Provincial Census Board while the Division Superintendent of Schools was Vice-chairman. Members were the Highway District Engineer, Provincial Auditor, Provincial Commander of the Philippine Constabulary, the Provincial Development Officer and the Provincial Agriculturist. The City Census Board was composed of the City Mayor as Chairman; City Superintendent of Schools, Vice-chairman; and the City Engineer, City Assessor and City Development Officer, members. Finally, the Municipal Census Board had for its Chairman the Municipal Mayor and ably assisted by the District Supervisor as Vice-chairman. The members were the Municipal Agriculturist, Station Commander, Municipal Treasurer and the Municipal Development Officer.

For each of these local census boards, the Provincial Census Officer, City Census Officer and the Municipal Census Officer were designated Executive Officer of their respective Board.

# **CENSUS ORGANIZATION**

The overall direction and instructions for the census undertaking emanated from the Executive Director of the National Census and Statistics Office or in his absence, the Assistant Executive Director.

Assisted by the Task Force from the Central Office and in coordination with the local census boards, the Regional Census Officers and the Provincial Census Officers directly supervised the field operations in their respective areas. The services of District Supervisors, Head Teachers and elementary school teachers from public schools were utilized as City/Municipal Census Supervisors, Team Supervisors and Enumerators in that order.

During the field operations, the 1980 Census Operations Center under the overall supervision of the National Census and Household Surveys Department Chief, was the operating body that monitored the overall operations. Lending support to the center were the Administrative and Fiscal Services Staff.

# METHOD OF ENUMERATION AND USE OF SAMPLING

The household was used as the enumeration unit and a complete listing of dwelling units, including vacant ones, was done.

A combination of complete enumeration and sampling was adopted. While all households were asked on the count of the population and housing characteristics, only twenty percent (20%) were asked on other characteristics. The selection of sample households was done systematically with a random start from a listing of households which was prepared simultaneously with the enumeration.

Using PH Form 2 (Common Private Household Questionnaire) and with an 80 percent coverage, the items asked on population were household membership, relationship to head, line number of mother, sex, date of birth, age as of last birthday and marital status. For the housing items, the type of building and the construction materials of roof and outer walls, number of rooms, floor area of the dwelling unit and the year the building was built were asked.

In addition to the population and housing items just mentioned, additional information were asked using PH Form 3 (Sample Private Household Questionnaire) from the 20 percent samples such as language or dialect generally spoken at home, citizenship, usual residence of mother at person's birth, residence of person in 1975, ability to speak Pilipino and English, school attendance, highest grade completed, literacy, economic activity of the person, place of schooling or work, fertility, nature of occupancy of the dwelling unit and housing facilities and conveniences.

Collective households were enumerated using PH Form 4, where the information asked were the same as those in PH Form 2, excluding housing items.

# PLACE WHERE ENUMERATED

All persons were enumerated in their usual place of residence, which is the geographic place (street, barangay, sitio, municipality or province) where the enumerated person usually resides. As a rule, it is the place where he usually sleeps; therefore, it may be the same as or different from the place where he was found at the time of the census.

# POST ENUMERATION SURVEY

Originally the plan was to conduct a Post Enumeration Survey covering the whole country. For lack of funds the survey had to be confined to Metro Manila. Its purpose was to determine the extent of underenumeration or overenumeration in the 1980 Census of Population and Housing.

A sample of 132 barangays was selected. However, in 59 barangays which were divided into two or more enumeration areas (EAs), an enumeration area was chosen as sample.

A complete listing was made of households in the sample barangays/EAs using PH Form 1-B. Twenty percent of these households were selected as sample households and interviewed using PH Form 2, which was the same questionnaire used for non-sample households during the main enumeration. The housing portion of this form was disregarded.

# CONTENT AND COVERAGE OF THE PUBLICATION

In this publication, the population and households were described according to the respective items listed below:

Population Items	Housing Items
Age	Type of Building
Sex	Type of Occupancy
Marital Status	Construction Materials of Roof and Outer
	Walls

Highest Grade Completed Year Built

Floor Area of Dwelling Unit Literacy

Tenure of Owner-Occupant with Respect Language/Dialect Spoken in the

to the Land Household

Kind of Lighting Facilities Gainful and Non-Gainful Occupation Major and Minor Industry Use and Source of Water Supply

Type of Toilet Facilities Migration Kind of Cooking Fuel Household Appliances

The above items are presented in the ten population tables and nine housing tables of this report.

Except for figures on total population and sex, all other characteristics were based on a 20 percent sample.

Aside from these published tables, 10 other tables on the above characteristics plus 6 statistical tables dealing on ever-married women 15 years old and over are also available to statistical users.

# **DEFINITION OF TERMS AND CONCEPTS**

# I - POPULATION

# BARANGAY

A barangay is the smallest political unit in the country and generally its enumeration is

assigned to one enumerator. For enumeration purposes, a large barangay is usually split into parts and each part is called an enumeration area (EA).

#### **ENUMERATION AREA**

An enumeration area (EA) is a delineated area assigned to one enumerator, usually consisting of about 300 households. A barangay or part of a barangay may have been designated as an enumeration area.

# **URBAN AND RURAL AREAS**

The same concepts used in the 1970 and the 1975 Censuses were followed in classifying areas as urban. According to these concepts, urbanized areas consist of:

- 1. In their entirety, all cities and municipalities having a population density of at least 1,000 persons per square kilometer.
- 2. Poblaciones or central districts of municipalities and cities which have a population density of at least 500 persons per square kilometer.
- 3. Poblaciones or central districts (not included in 1 and 2), regardless of the population size, which have the following:
  - a. Street pattern, i.e., network of streets in either parallel or right-angle orientation;
  - b. At least six establishments (commercial, manufacturing, recreational and/or personal services); and
  - c. At least three of the following:
    - A town hall, church or chapel with religious services at least once a month:
    - 2) A public plaza, park or cemetery;
    - 3) A market place or building where trading activities are carried on at least once a week;
    - 4) A public building like a school, hospital, puericulture and health center or library.
- 4. Barangays having at least 1,000 inhabitants which meet the conditions set forth in 3 above, and where the occupation of the inhabitants is predominantly nonfarming or fishing.

All areas not falling under any of the above classifications are considered rural.

# PERSONS ENUMERATED IN A PRIVATE HOUSEHOLD

The following were counted and enumerated as members of the household:

- 1. Persons whose usual place of residence is the place where the household lives and present at the time of visit of the enumerator, except those born after 12:01 A.M., May 1, 1980;
- 2. Persons whose usual residence is the place where the enumerated household lives, but temporarily away at the time of enumeration, such as:
  - a. persons temporarily away on vacation, business or pleasure trip or any other purpose in the Philippines who are expected to be back within six months,

- or within one year, if abroad;
- b. students who usually go home to their respective households at least once a week;
- c. persons working elsewhere who usually go home to their respective households at least once a week;
- d. patients confined in hospitals for not more than six months at the time of enumeration of the household, except those confined (1) as inmates (not patients in wards for temporary confinement) in tuberculosis pavilions;
   (2) in mental hospitals;
   (3) in leprosaria or leper colonies; and
   (4) in rehabilitation centers for drug addicts;
- e. trainees in the Armed Forces of the Philippines, if their training is not more than six months;
- f. convicts and detainees in provincial or municipal/city jails or military camps, who have been confined for not more than 6 months at the time of enumeration of the household, except those who have been sentenced for more than 6 months (including those whose sentence is on appeal), even though just confined; and
- g. officers and crew members of coastal, interisland, or fishing vessels; officers and crew members of ocean-going vessels who usually go home to their household at least once a year.
- 3. Boarders of the household who are working, looking for work or studying, and who do not go home at least once a week;
- 4. Employees of household-operated enterprises who eat and sleep with the household and who do not go home at least once a week;
- 5. Persons (other than those in "3" and "4") whose usual place of residence is elsewhere, but who have been away from their usual place of residence for more than 6 months:
- 6. Members of the Armed Forces of the Philippines including draftees, sleeping most of the nights with the household, except those who only board or lodge with the household and who usually go home at least once a week; in such a case, they will be enumerated in their own household;
- 7. Persons found in the household who have no usual place of residence elsewhere;
- 8. Persons found in the household who are not certain of being enumerated elsewhere;
- 9. Persons who consider the dwelling unit of the household as their usual place of residence but are living within the premises of a foreign embassy, ministry, legation or consulate, including non-Filipino employees who have been residents of the Philippines before such employment;
- 10. Citizens of foreign countries and Filipinos (balikbayan) who have resided or expect to reside in the Philippines for more than one year from arrival;
- 11. Persons who sleep in the same dwelling unit but may not be able to take all or some of their meals with the household because of the nature of their work or other similar reason (they take their meals at place of work, etc.), should be considered as part of the household; and
- 12. A household member who is alive as of 12:01 A.M., May 1, 1980, but dies prior to the enumeration of the household.

# PERSONS TOTALLY EXCLUDED FROM THE ENUMERATION

Totally excluded from the population count of the Philippines were:

- 1. Foreign ambassadors, ministers, consuls or other diplomatic representatives, and members of their households (except Filipino employees and non-Filipino employees who had been residents of the Philippines prior to said employment);
- 2. Citizens of foreign countries living within the premises of an embassy, legation, chancellory or consulate:
- 3. Officers and enlisted men of U.S. Military or Naval Forces and non-Filipino members of their households, irrespective of residence; foreigners who are civilian employees in U.S. military or naval stations and member of their families living within the premises of said stations or reservation; (Note: for foreigners who are civilian employees of said stations living outside the station or reservation, see Item 5).
- 4. Citizens of foreign countries who are Chiefs and officials of international organizations like UN, ILO or USAID, who are subject to reassignment to other countries after their tour of duty in the Philippines, and members of their families;
- 5. Citizens of foreign countries together with non-Filipino members of their families, who are students or who are employed, or have business in the Philippines and have been in the Philippines or expect to stay in the country for one year or less from arrival:
- 6. Citizens of foreign countries and Filipinos with usual place of residence in a foreign country, who are visiting in the Philippines and expect to stay in the country for one year or less from arrival (e.g. a balikbayan who will return to his usual place of residence abroad after a short vacation or visit in the Philippines);
- 7. Citizens of foreign countries in refugee camps/vessels; and
- 8. Residents of the Philippines on vacation, pleasure or business trip, etc. abroad, who have been away or expected to be away from the Philippines for more than one year from departure.

# USUAL PLACE OF RESIDENCE

The term refers to the geographic place (street, sitio, barrio/barangay, municipality or province) where the enumerated person usually resides. As a rule, it is the place where he sleeps most of the time; hence, it may be the same as or different from the place where he was found at the time of the census.

# HOUSEHOLD

A household usually consists of a group of persons who sleep in the same dwelling unit and have common arrangements for the preparation and consumption of food. A person who lives alone is considered as one separate household. Although in most cases a household consists of a related family group, some household members may have no relationship to the central group. Boarders and servants, for instance are counted as part of a particular household if they take their meals with the household and sleep in the same dwelling unit. Persons who sleep with a household but individually cook their meals or eat elsewhere are each considered as single-person household.

Three generations may be living in one dwelling unit. If they are divided into two or more groups whose eating arrangements are independent from each other, each group is counted as a separate household.

# PERSONS NOT LIVING IN HOUSEHOLD

Falling under this category are persons living in collective living quarters such as welfare institutions (orphanages and homes for the aged or infirm); penal and corrective institutions (jails, national penitentiary, and reformatory institutions); hospitals, sanatoria, leprosaria, and nurses homes; dormitories and boarding schools; lodging houses such as hotels, tourist homes and the like; military camps and others.

Most of these institutions house inmates for whom care or custody is provided by resident staff members, or persons residing in group quarters or in housing units on the institutional grounds.

Private families living within such institutions, however, are excluded from the classification, as well as persons (employees, students, etc.) who go home to their families on weekends or days off. Persons found in lodging houses, but who are on vacation or business trips and whose absence from home does not exceed six months on the day of enumeration, are likewise not counted as part of the institutional population.

# RESPONDENT

A respondent is any responsible adult member of the household who furnished the information or answers to questions during the interview.

# LANGUAGE/DIALECT GENERALLY SPOKEN IN THE HOUSEHOLD

This refers to the language or dialect spoken most of the time by members of the household. In cases where two or more languages/dialects are spoken by household members, the one most often used in conversations among members of the family of the head when most of them are gathered together is considered as the language/dialect generally spoken in the household.

#### **HEAD OF HOUSEHOLD**

The person responsible for the care and organization of the household is generally considered as the head of the household. He usually provides the chief source of income for the household.

In the case of a household consisting of two or more unrelated persons sharing a dwelling unit and sharing the same cooking facilities and meals, the head is usually the eldest male or female in the group regarded as such by the other members.

# RELATIONSHIP TO HEAD OF HOUSEHOLD

This determines how each household member is related to the head, who is usually the husband or father, although in his absence or if incapacitated, the wife may be designated as head.

- 1. Spouse a woman/man married to and living with the head. This includes legal marriages as well as common-law relationships.
- 2. Son/daughter the head's own child, stepchild, or adopted child.

- 3. Son-in-law/daughter-in-law refers to a household member related to the head by marriage to his daughter or son.
- 4. Grandson/granddaughter child of the son or daughter of the head.
- 5. Other relative a household member related to the head by blood, marriage, or adoption. Father, mother, aunts, nephews, parents-in-law and cousins are examples.
- 6. Others any person in the household who is usually a non-relative of the head. Boarders and servants fall under this category. Certain members of the household who are related to the head by blood or affinity, but are actually boarders or servants in the household, are classified under "Others".

For collective households and group quarters, the question on relationship refers to the person's relationship to the institution or establishment, and not to the person recorded as head.

# AGE AND DATE OF BIRTH

Data on the age of the population were obtained by asking the respondent the month and year of birth and the age itself of the household member before May 1, 1980. To ensure accuracy, a conversion table on age before May 1, 1980 was prepared for the use of enumerators, editors/coders and verifiers.

# MARITAL STATUS

This refers to the civil status of all persons 10 years old and over. A person in this age group is classified as single, married, widowed, separated or divorced, or civil status unknown, based on the following definitions:

- a. Single If never been married.
- b. Married Legally married or living consensually with husband/wife without benefit of a legal marriage. A person classified as "married" includes one who remarried after having been widowed, separated or divorced or one temporarily separated from spouse owing to the nature of work, illness or service in the Armed Forces.
- c. Widowed A person whose spouse died and who has not remarried at the time of enumeration.
- d. Separated —If permanently separated from spouse either legally or otherwise, due to marital discord.
- e. Divorced If bond of matrimony has been dissolved through a court decree and is therefore free to remarry.
- f. Unknown If civil or marital status is either not known to the respondent, or the respondent himself refuses to reveal the marital status of such person.

# **CITIZENSHIP**

Citizenship is defined as the legal nationality of a person. A citizen is a legal national of the country of the census; an alien is a non-national of the country.

# **LITERACY**

A person is considered literate if he is able to read and write a simple message in any language or dialect.

# HIGHEST GRADE COMPLETED

This has reference to the specific grade or year completed in elementary school, high school, college or university, by persons 7 years of age and over. Academic degree holders are classified according to the title of the degree received or the major field of study undertaken.

#### USUAL OCCUPATION

This refers to the specific job or kind of work that a person, who works most of the year, is usually pursuing, or if unemployed at the time of enumeration, it is the kind of work he used to do most of the year. A person is considered as usually working most of the year if he works for at least 10 hours a week for 26 weeks either for pay in cash or in kind, for a fee or profit in own farm, business or establishment or practice of a profession and without pay on family farm or enterprise. This particular group of workers is referred to as gainful workers.

For persons who do not work most of the year, the usual occupation relates to the non-gainful activities they usually do most of the year. Among such persons are housekeepers, students, pensioners, retired and disabled. However, a person who is housekeeping or schooling and also works in a gainful activity was reported as gainfully employed, even if more time was spent housekeeping or studying, as the case may be.

# **INDUSTRY**

Industry refers to the specific character and nature of business or industry or the place where the work is being performed in connection with the job or occupation reported for a person.

# **EVER-MARRIED WOMAN**

This refers to a woman who has already entered married life. Marriage here may either be legal or consensual union. At the time of enumeration the ever-married woman may still be married, or already widowed, separated or divorced.

# II - HOUSING

# BUILDING

A building is any independent free-standing structure comprising one or more rooms or other spaces, covered by a roof and enclosed within external walls or dividing walls with adjacent building which usually extend from the foundation to the roof. It usually contains one or more rooms internally connected with one another. A building therefore, is any structure intended for dwelling, storage, factory, shelter or for some other useful purposes.

For purposes of the 1980 Census of Population and Housing, only the following buildings were listed and assigned building serial numbers:

- a. A house or any kind of building or shelter where people were actually living;
- b. A residential building (house, apartment or accesoria, condominium) that was vacant;

- c. Hotel, motel, lodging house, dormitory or camp (construction, logging, mining, etc.) in operation;
- d. A commercial, office, industrial, agricultural or other kinds of buildings with one or more dwelling units (containing a kitchen/kitchen-dining room, living room and a bedroom, and with separate entrance) which were all vacant.

# The different types of buildings are:

- 1. Single house a complete structure intended for one household. It includes the so-called "nipa hut" or a small house that is built as a more or less permanent dwelling unit.
- 2. Duplex a structure intended for two households, with complete living facilities for each. It is divided either vertically or horizontally into two separate dwelling units which are usually identical.
- 3. Apartment/accesoria/condominium/row house

An apartment is a structure usually of several stories, made up of three or more independent entrances from internal halls or courts. It differs from an accesoria in that an apartment has one common entrance from the outside.

An accesoria is usually a one or two-floor structure divided into three or more dwelling units, each dwelling unit having its own separate entrance from the outside. Another name for accesoria is row house.

A condominium is usually a high-rise building where the dwelling units are owned individually but the land and other areas and facilities are owned in common.

- 4. Improvised (barong-barong) a makeshift or roughly constructed house usually built with salvaged materials.
- 5. Commercial/industrial/agricultural buildings not intended for human habitation but used as dwelling units at the time of the census.
  - Commercial a building used for transacting business or rendering professional services, such as a storage or an office building.
  - Industrial a building used for processing, assembling, fabricating, finishing, manufacturing or packaging operations, such as a factory or a plant.
  - Agricultural any structure used for agricultural purposes, such as a barn, warehouse, rice mill, etc.
- 6. Other housing unit (natural shelter, boat, etc.)

This refers to living quarters which are not intended for human habitation nor located in permanent buildings but which are, nevertheless, used as living quarters at the time of the census. Caves, other natural shelters and mobile housing units such as trailer, barge, boat, etc., fall within this category.

- 7. Hotel, lodging house, dormitory, etc. This group comprises permanent structures which provide lodging and/or meals on fee basis. Hotels, motels, inns, boarding houses, dormitories, pensions and lodging houses fall within this category.
- 8. Institutional (hospital/convent/school dormitory/penal institution, etc.) a building intended for persons confined to receive medical, charitable, or other care treatment such as jails and penal colonies, and other buildings like convents, school dormitories, etc.
- 9. Other collective living quarters any structure or shelter which does not fall under items 7 and 8. Included in this category are camps which are defined sets of

premises originally intended for the temporary accommodation of persons with common activities or interests like military camps, and other camps established for the housing of workers in mining, agriculture, public works or other types of enterprises.

# **DWELLING UNIT**

A dwelling unit is a separate and independent place of abode intended for habitation by one household, or one not intended for habitation but occupied as living quarters by a household at the time of the census.

Dwelling units counted included those that are occupied and those that are unoccupied.

# CONSTRUCTION MATERIALS OF ROOF

The kinds of materials used are as follows:

- 1. Galvanized iron/aluminum
- 2. Tile/concrete/brick/stone
- 3. Asbestos
- 4. Cogon/nipa
- 5. Makeshift/salvaged materials
- 6. Others (anahaw, etc.)

# CONSTRUCTION MATERIALS OF OUTER WALLS

The kinds of materials may be any of the following:

- 1. Galvanized iron/aluminum
- 2. Tile/concrete/brick/stone
- 3. Wood/plywood
- 4. Mixed tile/concrete/brick/stone and wood/plywood
- 5. Asbestos
- 6. Bamboo/sawali
- 7. Cogon/nipa
- 8. Makeshift/salvaged materials
- 9. Others (anahaw, etc.)

If the roof or outer walls are constructed of two or more materials the material most used was reported.

# YEAR BUILDING WAS BUILT

This refers to the year when the extent of construction permitted occupancy for living purposes. The year reported was the particular year when the occupancy started or when the building was fit for occupancy even if not occupied.

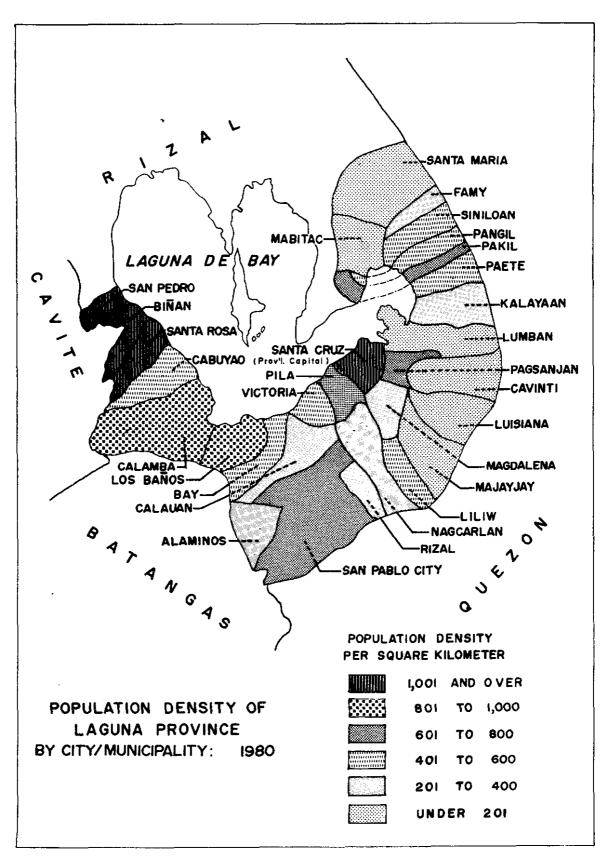

# NUMBER OF ROOMS IN THE DWELLING UNIT

A room is defined as a space in a dwelling unit or other living quarters enclosed by walls reaching from the floor to the ceiling or roof covering, or at least to a height of 1.8 meters which are of permanent or semi-permanent structure, of a size large enough to hold a bed for an adult or at least has an area of 3 square meters.

The total number of rooms reported included the bedrooms, dining room, living room, kitchen, roofed veranda, library or music room and other separate spaces used or intended for dwelling purposes, as long as they meet the criteria of walls and floor space. Passageways, lobbies, bathrooms and toilets or rooms used exclusively as store/shop/clinic/grains storage (nobody sleeps therein) were not counted as rooms even if they meet the criteria.

# FLOOR AREA OF DWELLING UNIT

This refers to the space enclosed by the exterior walls of the dwelling unit, or the space measured inside the outer walls of the spaces that are counted as rooms. In case of several floors, the area of each floor in square meters was taken and added together to get the total floor area of the dwelling unit. Areas of floor spaces that are not considered rooms such as bathroom, toilet, storeroom, passageway were excluded in determining the floor area.

# Laguna: A Brief Analysis

Laguna, an inland province located directly at the southern end of Rizal province, is bounded on the east by the Sierra Madre mountain range, on the south by Quezon and on the west by Batangas and Cavite. Its terrain consists mainly of narrow rolling plains extending along the eastern, southern and western shores of Laguna de Bay. A few elevated portions are found along the northwestern part of the province and on the southwestern part is its famous mountain, the legendary Mt. Makiling.

With a land area of 1,759.7 square kilometers, Laguna represents only 0.6 percent of the total land area of the country. In addition to other factors, its proximity to Metro Manila has contributed to its rapid growth and development. Among others the availability of electric power has ushered the proliferation of industrial concerns and subdivisions in the province. The NPC (National Power Corporation) Hydro-Electric Plant in Caliraya has also explored the potential of geothermal fields in Bay for power generation.

The province is composed of one city and 29 municipalities with Santa Cruz as its capital.

# **POPULATION**

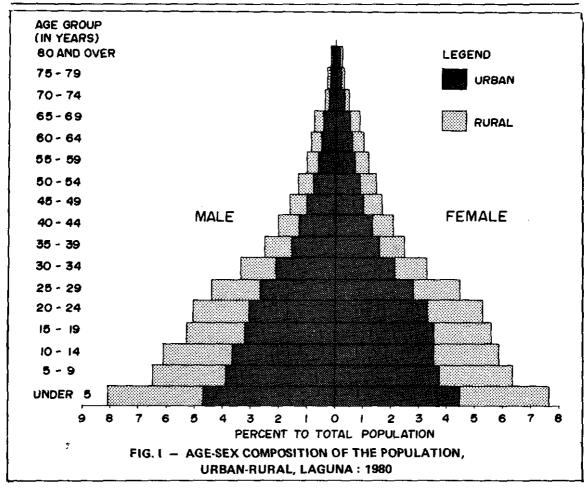

As reported in the 1980 census, Laguna had 973,104 inhabitants of which 487,135 were males and 485,969, females. Population-wise, the province ranked number 14 among the 73 provinces of the country. Its annual geometric growth rate was 3.90 percent. During the 1960 to 1970 intercensal period, the population grew annually at the rate of 4.01 percent, then dropped to 2.81 percent between 1970 and 1975. Population density of the province was 553.0, up from 456.8 inhabitants per square kilometer in 1975. With an increase of 96.2 persons per square kilometer, Laguna moved up from the third most densely populated province in 1975 to second in 1980.

Laguna is predominantly urban. More than three-fifths (60.97%) of its population reside in urban areas while 39.03 percent are in rural areas. The proportion of the urban population to the total population has been gaining in the last 10 years — from 50.08 percent in 1970 to 56.70 percent in 1975, moving up to 60.97 percent in 1980. As a result, the rural population correspondingly decreased from 49.92 percent in 1970 to 43.30 percent in 1975, further down to 39.03 percent in 1980.

A BRIEF ANALYSIS

# TABLE A – URBAN-RURAL POPULATION BY SEX, LAGUNA: 1970, 1975 AND 1980

	1980		197	75	1970	
Area Classification and Sex	Number	Percent	Number	Percent	Number	Percent
Total	973,104	100.00	803,750	100.00	699,736	100.00
Male Female	487,135 485,969	50.06 49.94	405,160 398,590	50.41 49.59	344,319 355,417	49.21 50.79
Urban	593,320	60.97	455,706	56.70	350,450	50.08
Male Female	294,435 298,885	30.26 30.71	227,664 228,042	28.33 28.37	171,276 179,174	24.48 25.60
Rural	379,784	39.03	348,044	43.30	349,286	<u>49.92</u>
Male Female	192,700 187,084	19.80 19.23	177,496 170,548	22.08 21.22	173,043 176,243	24.73 25.19

The sex ratio (number of males for every 100 females) of the province dropped from 101.65 in 1975 to 100.24 in 1980. The sex ratio was more pronounced in the rural areas (103.00) than in the urban areas where there were only 98.51 males for every 100 females.

The rural male and female population tend to follow an expansive profile of the agesex distribution. A large number of the rural male and female population are under 5 years of age. From this age group to the 80 years old and over, the rural male and female population decrease as each age group grows older. Both the urban male and female population follow the same pattern as their rural counterpart (Table 2).

# AGE COMPOSITION

Laguna has a high proportion of the younger age group (0-14 years), although a downward trend has been observed since 1970. The youth population constitutes 40.56 percent of the provincial total, or a decrease of 2.16 percentage points between 1975 and 1980, nearly equal to the 1970-1975 decline of 2.35 percentage points. The productive age group (15-64 years), on the other hand, maintains an upward swing. After rising 2.38 percentage points between 1970 and 1975 the productive age group increased 1.50 percentage points to 55.97 percent. The older age group (65 years and over) constitutes a small proportion of the provincial population (3.47%), slightly increasing by 0.66 percentage point within the five-year period.

TABLE B - AGE COMPOSITON OF THE POPULATION, LAGUNA: 1970, 1975 AND 1980

Age	198	80	197	1975		1970	
Composition	Number	Percent	Number	Percent	Number	Percent	
Total	973,104	100.00	803,750	100.00	699,736	100.00	
0-14 years	394,722	40.56	343,398	42.72	315,360	45.07	
15-64 years	544,642	55.97	437,770	54.47	364,490	52.09	
65 years and over	•	3.47	22,582	2.81	19,886	2.84	

The median age of the population is 19 years; half of the population are below 19 years old and the other half, above this age. An increase of 2 years in the median age is noted from 1975 to 1980, an indication that the population of Laguna is growing older.

With an increased percentage of persons in the productive ages, the dependency ratio is much lower in 1980 than it was in the past decade. The dependency ratio dropped from 91.98 in 1970 to 83.60 in 1975, moving down to 78.67 in 1980. The preceding table on age distribution shows that 44.03 percent of the population belong to the "dependent" population. The urban dependency ratio is lower than the rural ratio, 75.37 for the former and 84.08 for the latter. Of the total urban population, 39.44 percent are below 15 years old; 57.03 percent are in the productive age bracket and only 3.53 percent, 65 years and over. Comparatively, 42.31 percent of the rural residents are 0-14 years of age; 54.32 percent, 15-64 years old and 3.37 percent, 65 and over (Table 3).

# **MARITAL STATUS**

Declining by 4.86 percentage points, never married persons, which had always comprised a higher proportion of the population 10 years old and over, trailed behind the married which increased 4.03 percentage points to 50.70 percent. Increases are also noted in the widowed (0.48 percentage point), divorced or separated (0.32 percentage point, and not stated (0.03 percentage point) categories.

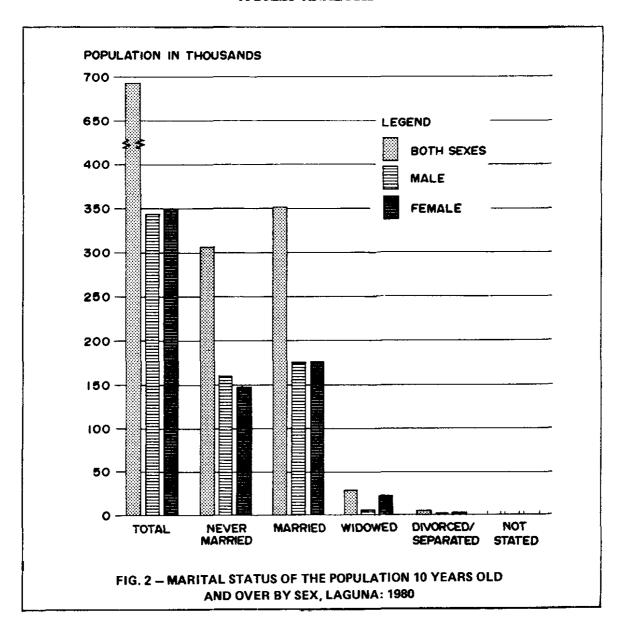

Over half of the rural populace were married (52.30%), compared to 49.71 percent of the urban dwellers. Never married persons constituted 42.66 percent of the rural population

while their urban counterparts made up 45.22 percent.

Nearly half, or 46.50 percent of the male population 10 years old and over were single, 5.05 percentage points lower than the 1975 proportion. In contrast, the proportion of married males increased from 46.25 to 51.05 percent. Widowed males, likewise increased by 0.02 percentage point and those divorced or separated, 0.22 percentage point. Among the females, 42.02 percent were never married, following a 4.62 percentage point decrease. Married females, on the other hand, rose from 47.08 percent to 50.35 percent. Similarly, widowed and divorced or separated females respectively increased by 0.89 percentage point and 0.41 percentage point (Table 4).

TABLE C — POPULATION 10 YEARS OLD AND OVER, BY SEX AND MARITAL STATUS, LAGUNA: 1970, 1975 AND 1980

	19	80	1975		1970	
Sex and Marital Status	Number	Percent	Number	Percent	Number	Percent
Both Sexes	694,793	100.00	568,644	100.00	482,133	100.00
Never married	307,372	44.24	279,161	49.10	236,564	49.07
Married	352,238	50.70	265,385	46.67	221,500	45.94
Widowed	29,436	4.24	21,398	3.76	20,479	4.25

Widowed	22,931	6.55	16,092	5.66	15,700	6.34
Divorced/separated	3,521	1.00	1,686	0.59	2,117	0.85
Not stated	276	0.08	74	0.03	266	0.11

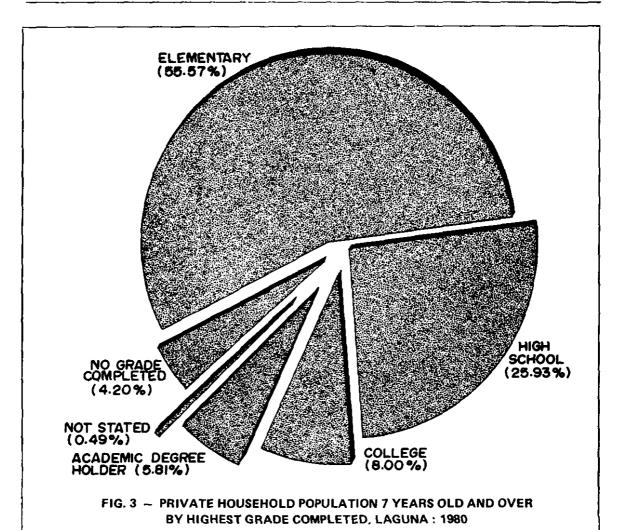

# **HIGHEST GRADE COMPLETED**

Persons with elementary education maintained a marked preponderance over those in the other categories, but dropped from 61.16 percent in 1975 to 55.57 percent of the private household population 7 years old and over. On the other hand, those who reached the secondary and college levels increased by 3.79 percentage points and 2.40 percentage points, respectively. Academic degree holders, likewise, rose by 1.64 percentage points, accounting for 5.81 percent. It is interesting to note that the proportion of persons who had no formal schooling went down from 5.79 percent in 1975 to 4.20 percent in 1980. Those who did not disclose their educational attainment made up 0.49 percent, 0.65 percentage point lower than the 1975 proportion.

A BRIEF ANALYSIS

# TABLE D - PRIVATE HOUSEHOLD POPULATION 7 YEARS OLD AND OVER BY HIGHEST GRADE COMPLETED, LAGUNA: 1975 AND 1980

	1	980	1975		
Highest Grade Completed	Number	Percent	Number	Percent	
Total	767,608	100.00	636,798	100.00	
No grade completed	32,234	4.20	36,849	5.79	
Elementary	426,553	55.57	389,453	61.16	
High school	199,047	25.93	141,017	22.14	
College	61,423	8.00	35,656	5.60	
Academic degree holder	44,612	5.81	26,531	4.17	
Not stated	3,739	0.49	7,292	1.14	

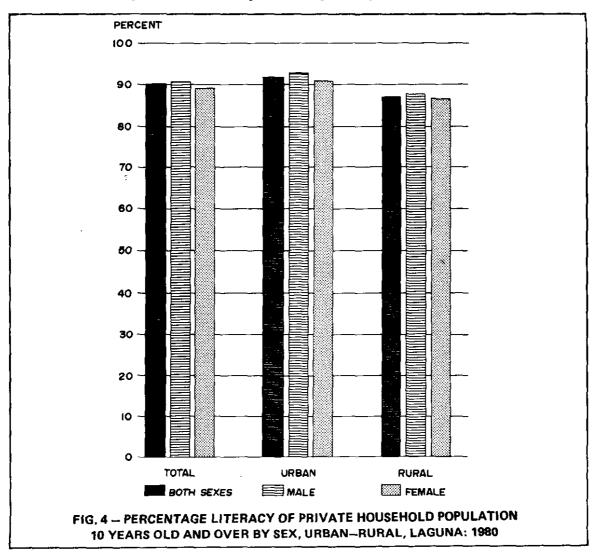

Of those who had elementary training, 37.30 percent graduated from the sixth or seventh grade; 31.34 percent did not go beyond the first to third grade; 17.74 percent attained the fourth grade and 13.62 percent, the fifth grade. Among those with secondary education, 56.88 percent reached anywhere from the first to third year while 43.12 percent graduated from fourth year. Majority of the college undergraduates (82.34%) finished the lower collegiate years (1st-3rd year) while 17.66 percent completed the fourth or higher year (Table 5).

# LITERACY

Laguna has a high literacy rate, with 90.01 percent of the private household population aged 10 and over able to read and write. Urban areas registered a higher rate than rural areas - 91.80 percent against 87.11 percent.

The male literacy rate (90.79%) is higher than that recorded for the females (89.24%). In both the urban and rural areas, the males also registered higher rates than their female counterparts – 92.74 percent and 87.74 percent, respectively, for urban and rural males compared to 90.90 percent and 86.47 percent, respectively, for the urban and rural females.

# LANGUAGE OR DIALECT

Tagalog is generally spoken in the province. Laguna being one of the 11 provinces composing the Southern Tagalog region, almost all of the 176,016 private households (174,646 or 99.22%) speak the dialect. The urban and rural areas are both predominated by Tagalog-speaking households, 99.14 percent and 99.35 percent, respectively. Ilocano is spoken by 0.20 percent; Bicol, by 0.17 percent and Lineyte-Samarnon (Waray), 0.08 percent. The remaining 0.33 percent speak one of several other dialects generally spoken in the province (Table 7).

# **GAINFUL OCCUPATION**

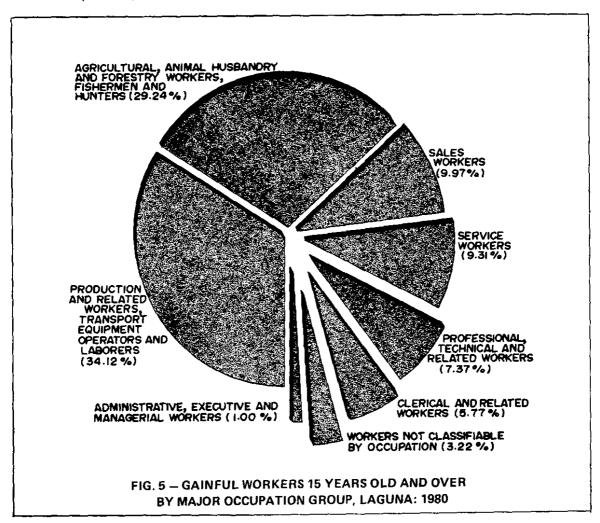

Gainful workers comprise 52.79 percent of the private household population 15 years old and over. The number of gainful workers has increased to 304,582 from the 1975 report of 235,976. A shift from the agricultural to the production-oriented occupation group is noted in 1980. Agricultural, animal husbandry and forestry workers, fishermen and hunters, with 35.16 percent in 1970 and 36.02 percent in 1975, dropped by 6.78 percentage points. In effect, production and related workers, transport equipment operators and laborers increased by 3.43 percentage points to 34.12 percent, leaving behind the topmost group of the 70's with only 29.24 percent. Sales workers, always third in rank, went down by 1.63 per-

TABLE E - GAINFUL WORKERS 15 YEARS OLD AND OVER BY MAJOR OCCUPATION GROUP, LAGUNA: 1970, 1975 AND 1980

Major	1980		1975		1970	
Occupation Group	Number	Percent	Number	Percent	Number	Percent
Total	304,582	100,00	235,976	100.00	225,553	100.00
Professional, technical and related workers	22,452	7.37	14,691	6.22	15,774	6.99
Administrative, executive and managerial workers	3,032	1.00	4,293	1.82	3,990	1.77
Clerical and related workers	17,581	5.77	10,092	4.28	7,680	3.41
Sales workers	30,361	9.97	27,376	11.60	24,028	10.65
Service workers	28,353	9.31	18,885	8.00	20,059	8.89
Agricultural, animal husband- ry and forestry workers, fishermen and hunters	89,060	29.24	84,995	36.02	79,306	35.16
Production and related workers, transport equipment operators and laborers	103,918	34.12	72,414	30.69	71,436	31.67
Workers not classifiable by occupation	9,825	3.22	3,230	1.37	3,280	1.46

centage points to 9.97 percent. Service workers place fourth, increasing its 1975 proportion (8.00%) by 1.31 percentage points. Professional, technical and related workers, at 7.37 percent, gained 1.15 percentage points. Clerical workers likewise rose from 4.28 percent to 5.77 percent while administrative, executive and managerial workers declined from 1.82 percent to 1.00 percent. Meanwhile, the proportion of workers not classifiable by occupation went up from 1.37 percent to 3.22 percent (Table 8).

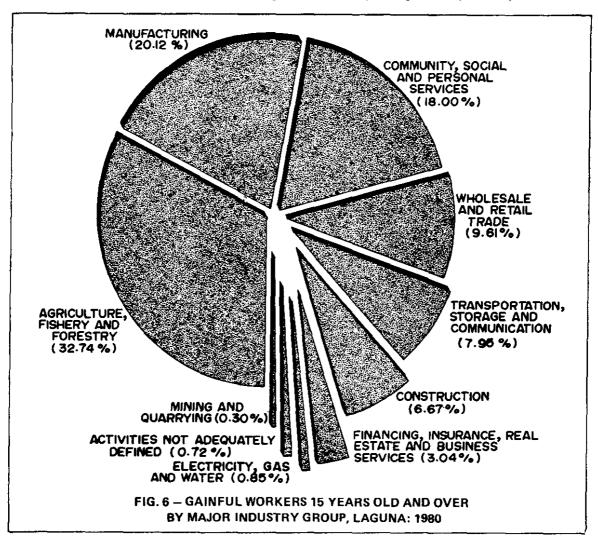

The urban areas turned out a higher proportion of gainful workers (53.54%) than the rural areas (51.57%).

# INDUSTRY

Agriculture, fishery and forestry, the dominant industry group in Laguna, provide means of livelihood to 32.74 percent of the total gainful workers 15 years old and over. Majority of the agricultural workers derive their income from agricultural crop production (80.67%) and more than one-tenth, from fishing (10.25%). Manufacturing employs a little over one-fifth, or 20.12 percent. Gainful workers in this industry group are mainly engaged in the manufacture of textile, wearing apparel and leather (44.44%); of food, beverages and tobacco (21.30%); and of wood and wood products, including furniture and fixture (12.74%). Community, social and personal services rank third with 18.00 percent. The three

leading sources of jobs in this industry group are personal and household services (37.76%), education services (22.30%), and public administration and defense (17.88%). Wholesale and retail trade contribute 9.61 percent; transportation, storage and communication, 7.95 percent; construction, 6.67 percent and financing, insurance, real estate and business services, 3.04 percent. Electricity, gas and water constitute only 0.85 percent; mining and quarrying, 0.30 percent and activities not adequately defined, 0.72 percent (Table 9).

# **MIGRATION**

Out of 818,422 private household population 5 years old and over, 92.56 percent were residents of the same municipality where they had lived on May 1, 1975. Of the 60,903 persons who then had a different place of residence, 26.15 percent moved to another municipality within their home province while 72.02 percent moved across provincial boundaries. Only a small percentage were residing in foreign countries (1.83%). In the three migratory movements, there were more females than males — larger by about 16.40 percent in the inter-municipality migration within the province; by 13.23 percent among migrants from other provinces and 10.98 percent among former residents of foreign lands. It is observed that in the three movements, majority (75.20%) migrated to urban areas (Table 10).

# TYPE OF BUILDING

More than four-fifths (88.15%) of the 176,016 households of Laguna occupy single houses. The rest live either in duplex (4.65%), apartments/accesorias/condominiums/row houses (3.47%), or improvised structures such as barong-barong (3.10%). Very few households dwell in commercial, industrial or agricultural buildings (0.52%); other housing units such as natural shelter, boat, etc. (0.06%); hotels, lodging houses, dormitories (0.10%); institutional buildings like hospital, convent, school dormitory, etc. (0.02%) or in other collective living quarters (0.01%).

Most of the households occupying single houses are found in urban areas (58.98%); 41.02 percent are from the rural areas. Of those living in duplex, over four-fiths (82.01%) are urban households and 17.99 percent, rural households. As expected, a large majority of the occupants of apartments,/accesorias/row houses, and similar structures are urban households (92.43%). Similarly, improvised structures are occupied mostly by urban households (51.60%).

It will be noted in the succeeding table that in 1970, 88.54 percent of the 115,839 households lived in single houses; 2.87 percent, in duplex; 2.30 percent, in apartments/accesorias/row houses; 5.19 percent, in improvised structures; 1.07 percent, in commercial/industrial/agricultural buildings and only 0.03 percent, in institutional buildings.

TABLE F - NUMBER OF HOUSEHOLDS IN CCCUPIED DWELLING UNITS BY TYPE OF BUILDING, LAGUNA: 1970 AND 1980

m on ar-	19	980	1970		
Type of Building	Number	Percent	Number	Percent	
Total	176,016	100.00	115,839	100.00	
Single house	155,166	88.16	102,566	88.54	
Duplex	8,186	4.65	3,330	2.87

school dormitory, etc.)	40	0.02	34	0.03	
Other collective living quarters (military camp, etc.)	10	0.01	-	_	

# TYPE OF OCCUPANCY

Table 1 shows that 79.12 percent of the total households are owners of the dwelling units they occupy. The rest of the households are either tenants/lessees (10.62%), subtenants/sublessees (0.39%) or rent-free occupants (9.87%).

# CONSTRUCTION MATERIALS OF ROOF AND OUTER WALLS

Most of the households in the province reside in dwelling units constructed with roof of galvanized iron (87.58%). Less than one-tenth (8.62%) live in units built with roof of cogon or nipa; 2.96 percent, of makeshift or salvaged materials, or others such as anahaw and 0.84 percent, of tile, concrete, brick, stone or asbestos. Households occupying units with roof of galvanized iron are a common sight in both the urban (91.58%) and the rural (81.28%) areas, while those with roof of cogon or nipa make up 5.41 and 13.68 percent, respectively.

By type of construction materials of outer walls, 35.71 percent of the households live in dwelling units built with walls of mixed tile, concrete, brick or stone and wood or plywood; 30.50 percent, of wood or plywood; 14.70 percent, of bamboo or sawali and 10.86 percent, of tile, concrete, brick or stone. A few households dwell in units constructed with walls of makeshift or salvaged materials (2.61%); cogon or nipa (2.37%); galvanized iron or aluminum (1.82%) and other materials (1.38%). Only 84 households or 0.05 percent dwell in units walled with asbestos. Most of the households in the urban areas live in units built with walls of mixed tile, concrete, stone and wood or plywood (40.21%); 31.38 percent, of wood or plywood and 13.06 percent, of tile, concrete, brick or stone. In the rural areas, households living in units with walls of wood or plywood constitute 29.12 percent; 28.63 percent, of mixed tile, concrete, brick or stone and 25.23 percent, of bamboo or sawali (Table 2).

# YEAR BUILT

Over one-third or 34.01 percent of the households are occupants of structures built in 1976-1980; 21.43 percent, during 1971-1975; 21.96 percent, 1961-1970 and 12.26 percent, 1951-1960. Only 5.85 percent live in buildings constructed during 1942-1950 and 4.49 percent, before World War II (Table 2).

# FLOOR AREA OF DWELLING UNIT

More than two-fifths of the households (45.83%) in Laguna occupy dwelling units with floor area less than 30 square meters. About 28.28 percent live in 30-49 square-meter dwelling units; 11.29 percent dwell in 50-69 square-meter units and 7.12 percent, in 70-99 square meters. Only 7.48 percent have spacious dwelling units from 100 square meters and over (Table 3).

# TENURE OF OWNER-OCCUPANT WITH RESPECT TO THE LAND

Of the 139,262 households that own their dwelling units, 65.72 percent also own the land where the structures are erected. The rest are distributed as follows: 11.79 percent, lessee or sublessee; 4.78 percent, farm lessee/agricultural tenant of landowner; 4.93 percent, other legal tenure and 12.78 percent, no tenure such as squatters (Table 4).

# SOURCE AND USE OF WATER SUPPLY

A greater proportion of the total number of households in the province depend largely on the faucet, community water system than on any other source of water supply whether for drinking (49.97%), for kitchen use (48.90%) or for washing clothes (43.56%). Two other main sources of water for drinking, for kitchen use and for washing clothes are the tubed or piped deep and shallow wells. Approximately 31.80 percent use water from tubed or piped deep well for drinking and 11.10 percent, tubed or piped shallow well. A few households rely on spring (3.84%); dug well (2.67%); lake, river, stream, etc. (0.58%) and rain (0.04%) as their sources of drinking water. For kitchen use, 31.68 percent use water from tubed or piped deep well; 11.20 percent, tubed or piped shallow well; and 3.62 percent

each from dug well and spring. Only 0.11 percent use rain water and 0.87 percent, water from lake, river, stream, etc. For washing clothes, 28.83 percent use water from tubed or piped deep well; 10.86 percent, lake, river, stream, etc. 9.85 percent, tubed or piped shallow well; 3.47 percent, spring; 3.36 percent, dug well and 0.07 percent, rain (Table 6.)

# KIND OF LIGHTING FACILITIES

Effects of the government's massive electrification program are widely felt throughout the province. As shown in Table 5, nearly three-fourths (74.00%) of the total number of households use electricity, an increase of 17.22 percentage points within a 10-year period. Correspondingly, users of kerosene decreased by 18.12 percentage points, from 42.96 percent in 1970 to 24.84 percent in 1980. Only 0.92 percent use liquefied petroleum gas (LPG); 0.14 percent, oil and 0.10 percent, other kinds.

Majority of the urban (85.58%) as well as the rural dwellers (55.77%) use electricity for lighting. Kerosene is more widely used among rural (42.51%) than among urban households (13.61%). Compared to their counterparts of the past decade, 74.55 percent of the urban households used electricity and 25.25 percent were kerosene users. Over three-fifths (60.38%) of the rural households used kerosene and 39.30 percent, electricity.

# **COOKING FUEL**

Wood or charcoal is still widely used for cooking by Laguna residents. More than half (54.28%) of the total households cook with wood or charcoal. A little over one-fith (20.16%) use liquefied petroleum gas (LPG); 16.39 percent, kerosene; 8.37 percent, electricity and 0.80 percent, other kinds of cooking fuel. Compared to 1970, the proportion of households using wood or charcoal and kerosene decreased by 8.56 and 7.52 percentage points, respectively, attributable to corresponding increases of 10.05 and 5.55 percentage points in the proportion of households using LPG and electricity. Users of other kinds likewise increased by 0.48 percentage point.

The predominant use of wood or charcoal is observed in the rural areas where more than three-fourths or 77.27 percent of the households use either kind of cooking fuel. The rest of the rural households use either electricity (4.05%), kerosene (9.20%), liquified petroleum gas (8.32%) or others (1.16%). It is also noted that a good number of urban residents cook with wood or charcoal (39.68%); 27.69 percent, with liquified petroleum gas; 20.96 percent, kerosene 11.11 percent, electricity and 0.56 percent others.

# **TOILET FACILITIES**

More than one-third (37.79%) of the households use the water-sealed with sewer or septic tank type of toilet facility. Approximately 18.50 percent use the water-sealed with other depository type; 15.05 percent, the closed pit (antipolo, etc.); 12.19 percent, the open pit and 3.40 percent, other types (pail system, etc.). Households without toilet facilities constitute 13.07 percent.

Comparatively, urban households have better toilet facilities than their rural counterparts. Nearly half (48.04%) of the urban households use the water-sealed with sewer or septic tank type; 20.23 percent, water-sealed with other depository; 11.55 percent, closed pit; 6.22 percent, open pit and 4.11 percent, other types. Among the rural households, 21.65 percent use water-sealed with sewer or septic tank; 15.78 percent, water-sealed with other depository; 20.56 percent, closed pit; 21.59 percent, open pit and 2.27 percent, other types. Nearly one-tenth or 9.85 percent of the urban households lack toilet facilities, compared to 18.15 percent of the rural households (Table 7).

# OWNERSHIP OF RADIO, TELEVISION SET AND REFRIGERATOR/FREEZER

Majority (72.14%) of the households in Laguna have radios; 34.04 percent own television sets while 23.25 percent have refrigerators or freezers. These figures represent increases of 8.64, 24.85 and 15.43 percentage points, respectively, over the proportion of households with these appliances in 1970. Of the 107,631 urban households, 74.91 percent own radios; 42.76 percent have television sets and 30.61 percent, refrigerators or freezers. Among the rural households, 67.78 percent have radios; 20.31 percent, television sets and 11.66 percent, refrigerators or freezers (Table 9).
